# VIRTUAL VISIT TO INDIAN PILGRIMAGE

#### Problem statement:

I am developing a website which will help the people to gain a experience of virtual visit to various pilgrimage places in India.

#### Solution:

I am implementing 360° view images connected, so everyone will get the view from all sides.

### Language:

I use html for creating the website for this virtual visit to Indian pilgrimage.

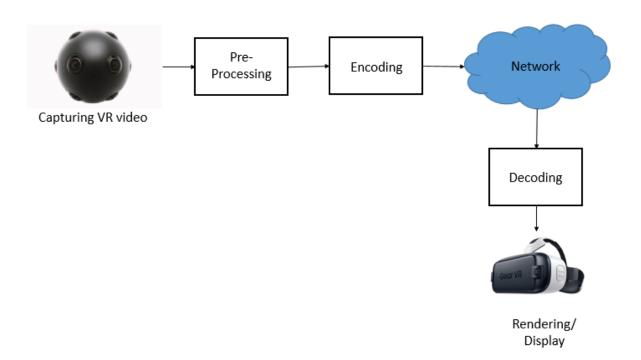

#### Future scope:

- > Implement a lot of pilgrimage sites of India.
- > Also to trying to increase its scalability.
- > Establish in VR mode experience.

### Marketing strategy:

- > Promotes various advertisements on our websites.
- ➤ Increase the revenue of the pilgrimage site.
- > Premium experience for pro members.

## Block diagram:

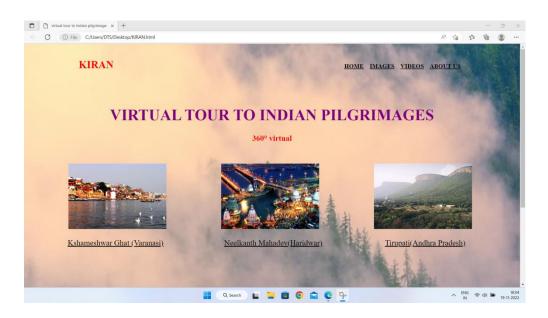

#### **Program:**

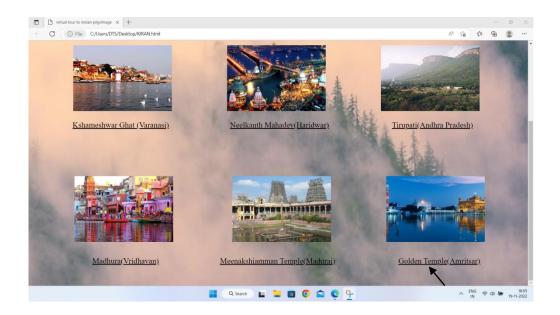

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="utf-8">
    <title>
      virtual tour to Indian pilgrimage
    </title>
    a {
      color: #000 !important;
  </style>
  <body background="C:\Users\DTS\Desktop\fog-4529616 340.jpg" style="background-</pre>
repeat:no-repeat; background-size:100%100%">
    <br/>

 </body>
```

#### Website:

If we click in the names of the places under the images it will show the 360° view of the places in that images.

#### Example pictures:
